

Volunteer Opportunities in the Kalamazoo Section of ACS
1/29/2011

There is always room for an interested member to help out. If you feel like you have something to offer to our local section, please contact any of the current officers. See a recent newsletter on our website for contact information.

Some specific needs are listed below.

Chair-elect. This is a leadership position that includes some expense-paid leadership training (and ACS indoctrination). The chair-elect becomes section chair in the second year of service. It helps to have some experience with local section programming and a positive impression of the ACS mission. If chemistry has been good to you, this is an excellent way to share your enthusiasm for our discipline.

National Chemistry Week Chair. The detailed job description for this is under review. It generally involves coordination of media presentation and our annual Chemistry Day program at the Kalamazoo Valley Museum (KVM) in celebration of National Chemistry Week (October of each year). This is done with excellent help from the KVM staff.

Section Archivist. If you are interested in history and like to organize and write, we would love to talk to you about updating our Local Section History (which now goes only through 1981). Contact [Lydia Hines \(lemhwgh@gmail.com\)](mailto:Lydia.Hines@lemhwgh@gmail.com) to discuss.
