

On June 17 the Chemistry Graduate Student Association (CGSA) at WMU hosted a barbecue at Oshtemo Township Park and invited members of the Department of Chemistry at WMU and KACS. This event, intended to help promote interaction among chemists both within the department and within the community, was attended by forty people (approximately 20 WMU students and 20 nonstudents). In addition to the barbecue, many people also participated in a game of soccer or Frisbee. It is our hope to do this again next year.
